

About Rallyhood

Rallies

With Rallyhood, users create "Rallies," which are private, online, digital spaces with communication and coordination tools to make collaboration fun and easy from a shared calendar, message board, and photo gallery to a place to upload and download files.

You may join GSHOM's Rallies and/or have a Rally created to connect with your troop.

Platform Features

Rallyhood eliminates the inefficiency of using various communication apps and creates a more consistent way for Girl Scout members and staff to stay organized and engaged online.

Rallyhood incorporates many current communication tools that make it easy to collaborate with other volunteers and parents/guardians.

Rallyhood combines:

- Event promotion, management, and registration
- Photo and file sharing
- Posting and responding
- And much more!

Development History

For years, Rallyhood developers have worked with Girl Scout volunteers and council staff around the country, and its functionality has been designed specifically for councils, service units, and troops.
